Location: Bhubaneswar, Odisha

PROFESSIONAL SUMMARY

Software Developer with experience in React Native (Expo), JavaScript ES6+, REST/SOAP API integration, JWT authentication, software testing, and mobile application development. Skilled in developing production applications, implementing Firebase Cloud Messaging (FCM), API integration, AI-assisted debugging, and software quality assurance. Proficient in Git, GitHub, Android Studio, Postman, Firebase, EAS Build, JSON/XML validation, CI/CD workflows, and Agile/Scrum development.

EDUCATION

C. V. Raman Global University Bhubaneswar, Odisha
Master of Computer Applications (MCA), CGPA: 8.56

PROFESSIONAL EXPERIENCE

Software Developer (Mobile & Automation) Sep 2025 – Present
Abrosys Technology Pvt. Ltd.

- Developed and maintained production mobile applications using React Native (Expo) for Android and iOS.
- Integrated REST/SOAP APIs, implemented JWT authentication, Firebase Cloud Messaging (FCM), and validated JSON/XML responses.
- Built and released production APK, AAB, and IPA using Expo EAS Build, resolving build, dependency, and Android SDK issues.
- Designed and enhanced application modules, optimized performance, and improved API synchronization and user experience.
- Performed Manual, Functional, Regression, UI, and API Testing using Postman, collaborating with developers to resolve production issues.
- Contributed to ETA-GIT, automation tools, Windows installer (EXE/MSI) creation, and technical SEO initiatives while leveraging AI tools for debugging and code analysis.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, HTML, CSS, SQL, C

Frontend: HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, React Native (Expo)

Backend: Java, Node.js, Express.js, REST APIs

Database: MySQL, Oracle, MongoDB

Testing: Manual Testing, Functional Testing, Regression Testing, API Testing, UI Testing

Tools: Git, GitHub, Postman, Android Studio, VS Code, IntelliJ IDEA, Eclipse, Firebase, Expo, EAS Build, Advanced Installer

Other Skills: JSON/XML Validation, FCM Integration, APK/AAB & IPA Build Generation, Prompt Engineering, AI-Assisted Development, Technical SEO

Microsoft Office: Excel, PowerPoint, Word

SOFT SKILLS

- **Leadership**: Demonstrated by taking initiative and guiding team projects.
- **Team Collaboration**: Working cohesively with peers to achieve common goals.
- **Effective Communication**: Clearly conveying ideas and facilitating discussions.
- **Problem-Solving**: Addressing challenges and finding solutions during projects.
- **Adaptability**: Adjusting to new roles and responsibilities as needed.

PROJECTS

ETA Mobile Application

- Developed and enhanced production features using React Native (Expo), JWT authentication, REST APIs, and Context API.
- Designed and implemented Status, Driver Status, Find, Info (Test Mode), PCOB, and POD modules with real-time local state updates and optimized shipment management.
- Implemented foreground/background notification workflows, ACK processing, shipment tracking, and optimized synchronization without unnecessary API calls.
- Refactored application architecture, improved UI/UX, Android navigation, shipment handling, and application performance while reducing API-related issues.
- Generated and tested multiple Android APK releases, resolved production bugs, and collaborated with the team during feature development and QA.

Task Cafe

- Developed and enhanced features using React Native (Expo), SOAP APIs, Firebase Cloud Messaging (FCM), and REST API integration across Android and iOS.
- Implemented and debugged Task Details functionality, including task updates, editable dropdowns, assignee mapping, and role-based (ETA/Non-ETA) access with SOAP API integration.
- Upgraded the project to meet the latest Android SDK requirements, resolved Gradle, TypeScript, and dependency issues, and generated production-ready APK, AAB, and IPA builds.
- Configured Firebase by replacing the company google-services.json, resolved FCM token generation issues, and validated push notification workflows.
- Performed end-to-end testing, resolved UI, API, and build-related issues, and verified application stability across Android and iOS platforms.

ETA Bot Automation System

- Worked on device data extraction, active user monitoring, and automation workflows.
- Assisted in debugging, performance optimization, and system monitoring activities.

ETA-GIT Desktop Application

- Performed Manual, Functional, Regression, UI, and API Testing for repository management, collaboration, and synchronization workflows.
- Collaborated with developers using Claude AI, Gemini AI, and prompt engineering for bug analysis, AI integration, and solution validation.
- Investigated Clone, Fetch, Pull, History, and repository synchronization issues to improve Git-like workflow and application stability.
- Designed and validated Repository Explorer, collaboration features, notifications, and GitHub Desktop-style UI/UX improvements.
- Built and tested Client & Server EXE releases, validating deployment, AI reporting, and multi-user collaboration workflows.

Windows Installer Creation

- Created and deployed Windows installers (EXE/MSI) for software distribution to 50+ stakeholders.
- Validated installation packages and deployment configurations.

SEO Optimization

- Supported technical SEO initiatives and website performance optimization to improve search visibility and user experience.
- Contributed to content optimization and on-page SEO improvements for better search performance
