SHIVAM JAISWAL

Full Stack Developer (MERN) | React Native & Expo | Web, Mobile & Automation
Bhubaneswar, Odisha, India | +91 6371272745 | sivamjaiswal322@gmail.com
linkedin.com/in/shivam-jaiswal-cgu | github.com/Shivam-Jais | codewithhustle.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with professional experience building, testing, releasing and maintaining production mobile, web and desktop applications using React, React Native (Expo), Node.js, Express.js and MongoDB. Skilled in JavaScript (ES6+), TypeScript, Redux, Context API, REST and SOAP API integration, JWT authentication, Firebase Cloud Messaging (FCM), Razorpay payments and Expo EAS Build. Delivered responsive websites for local businesses and clients, and experienced across the full software lifecycle: requirement gathering, development, manual and API testing, Android/iOS/Windows release builds, Google Play and App Store deployment, automation workflows and production support. Also has hands-on machine learning experience with Python and Scikit-learn.

TECHNICAL SKILLS

- **Frontend & Mobile:** React.js, React Native, Expo, Expo Router, React Hooks, React Navigation, Redux, Context API, HTML5, CSS3, Responsive Design, AsyncStorage, Local Caching, Push Notifications
- **Backend & Databases:** Node.js, Express.js, REST API, SOAP API, JWT Authentication, JSON, XML, MongoDB, MySQL, Oracle, SQL
- **Languages:** JavaScript (ES6+), TypeScript, Python (Scripting & Automation), HTML, CSS, SQL
- **Machine Learning:** Python, Pandas, NumPy, Scikit-learn, Logistic Regression, Data Preprocessing
- **Payments & Cloud:** Razorpay, Firebase, Firebase Cloud Messaging (FCM), Cloudinary, Render, Netlify
- **Build & Deployment:** Expo EAS Build, Expo Prebuild, APK, AAB, IPA, Gradle, Android Studio, Android SDK, Android Keystore and App Signing, Google Play Console, Apple App Store Connect, Windows Installers (EXE/MSI)
- **CI/CD & DevOps:** CI/CD Fundamentals, GitHub Actions, Automated Builds, npm, Git Workflows
- **Testing & Tools:** Postman, Manual, Functional, Regression, UI, API and Integration Testing, Device Testing, Git, GitHub, VS Code
- **AI & Other:** Claude AI, Gemini AI, Prompt Engineering, Automation Workflows, Technical SEO, On-Page SEO, HR Operations

PROFESSIONAL EXPERIENCE

Software Developer – Mobile, Web & Automation **Sep 2025 – Present**
Abrosys Technology Pvt. Ltd., Bhubaneswar, Odisha

- Develop and maintain production React Native (Expo) applications for Android and iOS with reusable components, navigation, state management, API integration and responsive UI.
- Build full-stack features across React and React Native frontends and Node.js/Express.js REST backends with MongoDB, including authentication and role-based access.
- Work directly with clients and stakeholders to gather requirements, clarify change requests, suggest technical and product improvements, and convert them into features.
- Integrate REST and SOAP APIs, JWT authentication, JSON/XML workflows, Redux and Context API; implement FCM foreground and background push notifications.
- Optimize API synchronization, local caching and state updates for shipment tracking, task workflows and role-based features.
- Generate and validate production APK, AAB and IPA builds using Expo EAS Build, Expo Prebuild, Gradle and Android Studio; manage keystore signing, app versioning, Google Play Console and App Store submissions.
- Perform manual, functional, regression, UI, API, integration and physical-device testing with Postman and Android devices; troubleshoot build, signing and compatibility issues.
- Create and deploy Windows installers (EXE/MSI) for 50+ stakeholders; support technical SEO and website performance optimization, including on-page and content improvements.
- Manage HR operations alongside engineering duties, including recruitment coordination, onboarding, employee records and documentation.

APP PROJECTS (ANDROID & iOS)

ETA Mobile Application (Production App) **React Native, Expo, JavaScript, Redux, Context API, REST, JWT, FCM**

- Developed Status, Driver Status, Find, Info/Test Mode, PCOB and POD modules with shipment tracking and notifications.
- Implemented foreground/background notifications, ACK processing, local state updates and optimized API synchronization.
- Delivered requirement changes, bug fixes, UI/UX improvements and release validation.

TaskCafe (Production App) **React Native, Expo, TypeScript, REST, SOAP, Firebase, FCM**

- Built task details, task updates, editable dropdowns, assignee mapping, role-based ETA/Non-ETA workflows and force-update.
- Resolved Gradle, TypeScript, dependency, Android SDK, Firebase/FCM and native configuration issues.
- Generated and tested APK, AAB and IPA releases with end-to-end functional, UI, API and regression testing.
- Learned CI/CD fundamentals and created a GitHub Actions CI workflow that installs dependencies and checks TypeScript errors automatically on every push.
- Fixed the CI dependency installation failure using npm ci --legacy-peer-deps and verified the workflow runs successfully.
- Started an automated Android APK build workflow with GitHub Actions, Java and Gradle; traced a build failure to the android/ folder being excluded by .gitignore, learning how ignored files affect CI/CD builds.

P-GYM – Gym Management & Membership App **React Native, Expo, Redux, Node.js, Express.js, MongoDB, Razorpay, FCM**

- Independently designed, built and deployed a full-stack gym management app with authentication, membership plans, subscription approval, admin panel, gallery and exercise modules.

- Integrated Razorpay payments, FCM push notifications, subscription expiry reminders, AsyncStorage caching and Cloudinary image upload.
- Developed the Node.js/Express.js REST backend with MongoDB, deployed it on Render, and created Android release builds with Expo and Gradle.

WEB PROJECTS

Pritam Films – Cinematic Wedding Photography Website **React.js, JavaScript, HTML5, CSS3, Netlify**

- Built a responsive portfolio website for a wedding photographer to showcase cinematic work and attract clients. Live: pritamcinematic.netlify.app

Ajmera Trends Cuttack – Fashion Showroom Website **React.js, JavaScript, HTML5, CSS3, Netlify**

- Developed a website for a family fashion showroom in Cuttack presenting sarees, lehengas, ethnic and wedding wear, with showroom location details. Live: ajmeratrends.netlify.app

R.K Sharma Fabrication – Business Website **React.js, JavaScript, HTML5, CSS3, SEO, Netlify**

- Created a business website for an aluminium, glass partition, steel railing and interior fabrication company serving Bhubaneswar and Cuttack, with local-search SEO titles and descriptions. Live: sharamafabrication.netlify.app

Community Café – Coffee Shop Website **React.js, JavaScript, HTML5, CSS3, Netlify**

- Designed a responsive café website featuring specialty coffee, pastries and community space, with SEO and social-sharing meta tags. Live: cafe-coffe-day.netlify.app

Developer Portfolio Website **React.js, JavaScript, HTML5, CSS3, SEO, Netlify**

- Built a personal portfolio website presenting mobile, web and automation projects, optimized with SEO metadata. Live: codewithhustle.netlify.app

AUTOMATION & TESTING PROJECTS

ETA-GIT Desktop Application **Windows EXE, Git Workflows, Claude AI, Gemini AI, Prompt Engineering**

- Performed manual, functional, regression, UI and API testing for repository management, collaboration and synchronization workflows.
- Collaborated with developers using Claude AI, Gemini AI and prompt engineering for bug analysis, AI integration and solution validation.
- Investigated Clone, Fetch, Pull, History and repository synchronization issues to improve Git-like workflow and application stability.
- Designed and validated Repository Explorer, collaboration features, notifications and GitHub Desktop-style UI/UX improvements.
- Built and tested Client and Server EXE releases, validating deployment, AI reporting and multi-user collaboration workflows.

ETA Bot Automation System **Python, CSV, EXE, MSI, Windows Installer**

- Wrote Python scripts to extract system information such as system name, login time, login attempts and failures, RAM, ROM/storage and other device details, and saved the data to CSV files.
- Packaged the Python automation as a Windows EXE and created an MSI installer for the ETA Bot using Windows Installer for distribution.
- Worked on active user monitoring and automation workflows; assisted in debugging, performance optimization and system monitoring.

Windows Installer Creation (EXE/MSI) **Windows Installers, Deployment**

- Created and deployed Windows installers for software distribution to 50+ stakeholders.
- Validated installation packages and deployment configurations.

MACHINE LEARNING PROJECT

Credit Card Fraud Detection Using Machine Learning **Python, Pandas, NumPy, Scikit-learn**

- Developed a machine learning model to identify fraudulent credit card transactions using Python, Pandas, NumPy and Scikit-learn.
- Preprocessed data and trained Logistic Regression models, achieving 98% accuracy while reducing false positives.

SOFT SKILLS

- **Leadership:** Takes initiative and guides team projects.
- **Team Collaboration:** Works cohesively with peers to achieve common goals.
- **Effective Communication:** Clearly conveys ideas and facilitates discussions.
- **Problem-Solving:** Addresses challenges and finds solutions during projects.
- **Adaptability:** Adjusts to new roles and responsibilities as needed.

EDUCATION

Master of Computer Applications (MCA) **2025**

C. V. Raman Global University, Bhubaneswar | CGPA: 8.56
